Test Task

Full-stack developer

Task

Using Remix, MetaMask, and the OpenZeppelin implementation, create an ERC-20 token on an Ethereum testnet like Goerli or Rinkeby.

Use a faucet to obtain test Ether for deployment.

https://remix.ethereum.org/

https://docs.openzeppelin.com/contracts/4.x/erc20

https://faucets.chain.link/rinkeby

* The main goal is to see if you can do R&D.

** Those links are there to help you with the research.
